

Position Scope / Summary

The Customer Operations Specialist acts as a customer advocate while working closely with Production, Supply Chain, Engineering, Quality, and external Sales to provide solutions that fulfil our customers' needs and expectations with speed, accuracy and exceptional customer service. Reporting to the Customer Program manager this role will have responsibility for executing the quoting and order processes for the site in addition to supporting the process for revenue forecasting and the company CRM system and supply chain.

Duties / Responsibilities

- Develop and foster customer relationships with regular communication to understand their needs and expectations while acting with urgency and flexibility to ensure customer satisfaction.
- Communicating regularly in an open and respectful manner with cross functional teams to ensure the successful completion of:
 - Contract review for new parts and project management of initial builds.
 - Quotation creation for new and existing business.
 - Order processing and management for customer PO.
- Provide input for Business Reviews and participate as required.
- Working with the external Sales team to help grow the business, attend scheduled tradeshow events and customer site visits when necessary and support marketing activities.
- Collaborate to deliver on key service metrics.
- In partnership with other functions, support the creation of reporting metrics that show the site's performance to customer expectations.
- Ensure that all customer contractual obligations are implemented and maintained as required.
- Perform all required processes & procedures as documented in the Quality Management System.
- Provide analysis in support of site revenue forecasting and the preparation of reports for senior management review.
- To take on other duties which the Company may assign you from time to time. These "other duties" will be agreed with management prior to any assignment
- Working with supply chain to ensure material availability as required.

Requirements

- 3rd level qualification in Business, Supply Chain Management/Logistics or equivalent is required.
- 2-3 years Customer Services or Logistics/Supply Chain experience preferably in a regulated manufacturing environment.
- High level of PC skills required. The successful candidate must be proficient with Microsoft Word, Microsoft Excel and PowerPoint packages.
- SAP or equivalent experience an advantage but not a requirement. Excellent up to date excel skills essential.
- Excellent attention to detail communication and time management skills
- Strong Commercial Awareness/ Business acumen.
- Drive & Execution - Ability to work with a positive outlook to solve problems systematically. Taking all individual responsibilities seriously. Be prepared to accept challenging improvement goals.
- Organised, flexible, professional person that works well alone or a part of a multi-disciplined team.
